

Control box with digital display

Electronic flow sensor for precise application.

Selmech's own Crimpmaster stem pump.

Application range of 0.50 to 10 litres per minute open flow.

Choice of Manual or auto mode to set the application rate.

Totaliser records the amount of additive applied.

## Digital Control

The control box automatically monitors and adjusts the pump to keep its output constant, this enables the pump to deliver additive precisely.

## Operating modes

### Auto mode

Set output rate of your machine in tonnes per hour and enter the application rate in litres per tonne. The application rate is then set for you.

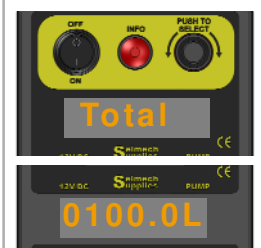

### Manual mode

Set the application rate in litres per minute.

In **Manual** and **Auto** mode the total litres dispensed are recorded

## Supplied
